Re: Updated 2016 International Cherry MRL Memo

On behalf of the California Cherry Board

As the 2016 cherry season approaches and crop protection decisions are being made, BCI wanted to provide California cherry shippers an updated international cherry maximum residue level (MRL) memo for major export markets.

While the information within this memo is considered accurate as of February 1, 2016, shippers are reminded that international MRLs can change frequently and it is the responsibility of the shipper to work with importers to ensure that product is compliant with foreign regulations.

Bryant Christie Inc. hopes this memo will be useful to California cherry shippers and wishes the industry success in the 2016 season.

I. Above-MRL Possibilities According to Industry Residue Data

- The following table indicates pesticides and markets where available pesticide testing data shows the possibility of an MRL violation. Data comes from a variety of public and private sources.
- Please note that these are not actual detections and that applying these pesticides does not automatically mean that residues will always be above the export market's MRL. Regardless, growers should exercise caution and always remain aware of MRLs in export markets.
- Additionally, growers and shippers should also pay close attention to pesticides indicated in **red bolded brackets, { }**, in the following tables. The pesticides in red and bold in this memo indicate where a foreign MRL is more restrictive than the US MRL. While not all restrictive MRLs are problematic, these represent situations where extra care should be exercised.
- While the pesticides in the table below have data to indicate that residues could exceed MRLs, data is not available for all pesticides and it is possible that these pesticides could exhibit residues that could exceed foreign MRLs that are more restrictive than US MRLs. In other words, the below tables do not necessarily represent the entire range of pesticides that could be problematic.

Pesticides with Residue Detections Capable of Exceeding MRLs in Major Markets		
Trade Name	Common Name	Markets in which the detected residue would have exceeded the MRL
Ambush/Pounce	Permethrin	EU, Canada
Asana	Esfenvalerate	EU, South Korea, Australia
Delegate	Spinetoram	EU, South Korea
Danitol	Fenpropathrin	EU
Elite/Orius	Tebuconazole	EU
Fyfanon	Malathion	EU
Imidan	Phosmet	South Korea
Misc.	O-phenylphenol	Taiwan
Mustang	Zeta-Cypermethrin	Canada
Piperonyl butoxide (PBO)	Piperonyl butoxide	EU, South Korea, Taiwan
PyGanic	Pyrethrins	Taiwan
Renounce/Tombstone	Cyfluthrin	Canada, Taiwan
Sevin	Carbaryl	EU
Tilt/Orbit	Propiconazole	EU
Warrior II	Lambda Cyhalothrin	EU, Taiwan

II. MRL Status of SWD Control Insecticides

The following table provides a summary of MRLs for insecticides investigated in Dr. Robert Van Steenwyck's efficacy trials in 2010. MRLs are updated through February 1, 2016.

Pesticide MRLs for SWD Insecticides in Major CA Cherry Export Markets

* indicates a default value is applied when no specific MRL has been established. Canada's default MRL is 0.1 ppm. Japan's default MRL is 0.01 ppm. The EU's default MRL is 0.01 ppm.								
"---" indicates that a country has not yet established a cherry MRL for this pesticide. While policies differ from country to country, this generally indicates that residues are not allowed.								

III. Summary of Pesticide Residues Screening Programs in Key Export Markets

- The following table summarizes pesticides known to be analyzed in official pesticide residue screening programs in key export markets. This information is based on the most recent screening plans available for each market. This summary is for informational purposes only and is not intended to guarantee that a given pesticide will not be tested for as part of import inspection programs in foreign markets.
- **It is critical that growers, packers, and exporters understand that foreign residue screening programs change frequently and foreign regulators may at any time choose to analyze for any of the pesticides approved for use on cherries in California.**
- Prior to shipping, exporters should first confirm that consignments comply with export market regulations.
